

## **Jeremy Littell**

Jeremy Littell is a member of the JISAO/CSES Climate Impacts Group and a Ph.D. candidate at the University of Washington, College of Forest Resources. His research focuses on the role of climate, climate change, and fire in mountain ecosystems of western North America. He conducts field studies in four mountain protected areas in the western U.S., with a focus on Olympic, North Cascades, Glacier, and Yellowstone National Parks.

Littell received his M.S. in Land Resources and Environmental Science at Montana State University Bozeman, where he studied the impacts of climate variability on fire regimes in northern Yellowstone. He holds a B.S. in Environmental Studies from Huxley College of the Environment at Western Washington University in Bellingham, WA.
